Subject: Georgetown Flume

I had a recent follow-up meeting w/KC (Jack Frazelle) and Boeing (Larry Allen) regarding the purchase of the flume by KC. Jack Frazelle (296-7431), Assistant Airport Mgr, would like to commence discussions w/SCL & Legal regarding the environmental condition of the flume. Larry showed me an independent report by Lauck's Testing Laboratories, Inc. dated 01/05/87 indicating that the flume was free of pcbs. My last report regarding the flume was WO#90-6 by Raven on 01/03/91.

KC is very much interested in acquiring the flume. Our next meeting is scheduled for Aug 19, 1997, 10am, at the KC Airport Admin Bdg. David, 4-3337.
